

Day and night safe

# PRYM

Our pride. Your decision.

# ONLY THE FIRST ONES ARE REMEMBERED

PRYM - A new and unique product that delivers innovation to the world of day-night drop in safes. We are extremely proud that we can present to our reputable partners, monetary institutions, a Croatian product which fully complies with the high standards of modern legislation. It complies with the Law on the Protection of financial institutions (Official Gazette 56/15) and the Regulation on the list of accepted standards and codes of practice in the application of the protection of monetary institutions (Official Gazette 102/16)

PRYM - saving time and money, and making business safer

Day and night safe

# PRYM

Certificate:

**ICECON CERT**

The degree of resistance:

**N-III according to EN 1143-2**

Manufacturer:

**Bravarija Piljek**

# WORKS, NOT WORDS

Bravarija Piljek is well-known for its impeccable quality and reliability of its products and services, as well as the continuous development which is followed by continuous investment into new knowledge and technology.

With PRYM we aim to follow the trends and needs of financial institutions and further improve the quality of service they provide to their clients.

Relax, you are in safe hands.

**Only the best is good  
enough for us.  
We expect the same from  
our clients**

**Our product safety is the  
synergy of our ability,  
knowledge and experience.**

# QUALITY GUARANTEES TRUST.

A high level of expertise, hard work and many years of experience in the field of technical protection of persons and property, as well as the expressed customer confidence, are a guarantee of the strength and success of Bravarija Piljek, now successfully integrated in PRYM.

Therefore, we can safely say that powerful things come from small beginnings.

**Everyone seeks security.  
We offer it.  
Security above all is our guiding  
thought.**

# SAFE? SURE.

Deposit system devices have been developed to enable maximum security of deposits, and using security bags with integrated alarm, as accessories, enables additional protection from manipulation during transport.

# I BELIEVE, BECAUSE IT IS UNBELIAVABLE.

PRYM system is designed to protect against attempts of sabotage and manipulation, at the same time allowing simple and fast handling in order to reduce the possibility of risk of possible attacks. Adjusted for network operation, all operations are controlled via computer. The electronics system is simple and reliable, and can be fully adapted to the requirements of the client.

**Our business decisions are built  
on trust.  
We believe on Prym, you can  
believe as well**

## TECHNICAL SPECIFICATIONS

Electronic day-night drop in safe

### PRYM

UNIQUE MARKET PRODUCT

---

Fully adapted to the needs of users and clients.

Software solutions and a high level of protection comply with legal regulations. The possibility of inserting larger deposits, up to 400 banknotes in one bag with the dim. 210x270mm, are additional benefits of the device. DNT has been tested in the categorization of night safes, classified as "Safe deposit device" with a high degree of burglary resistance: N-III / EN 1143-2, and is thus intended for installation, both within the object and on its external part (street).

---

### CERTIFICATE

**Degree of resistance to burglary:** N-III according to the European standard EN 1143-2, issued by the accredited legal entity ICECON CERT S.R.L, Bucharest, Romania in accordance with ISO / OEC 17,065

---
